1. Trust Validation to Real-Time Threat Visualization

- Implemented a real-time, interactive threat map to provide users with immediate insights into global cyberattacks, vulnerabilities, and risks.
- Direct users to the Check Point Infinity AI page (https://www.checkpoint.com/infinity/ai/)

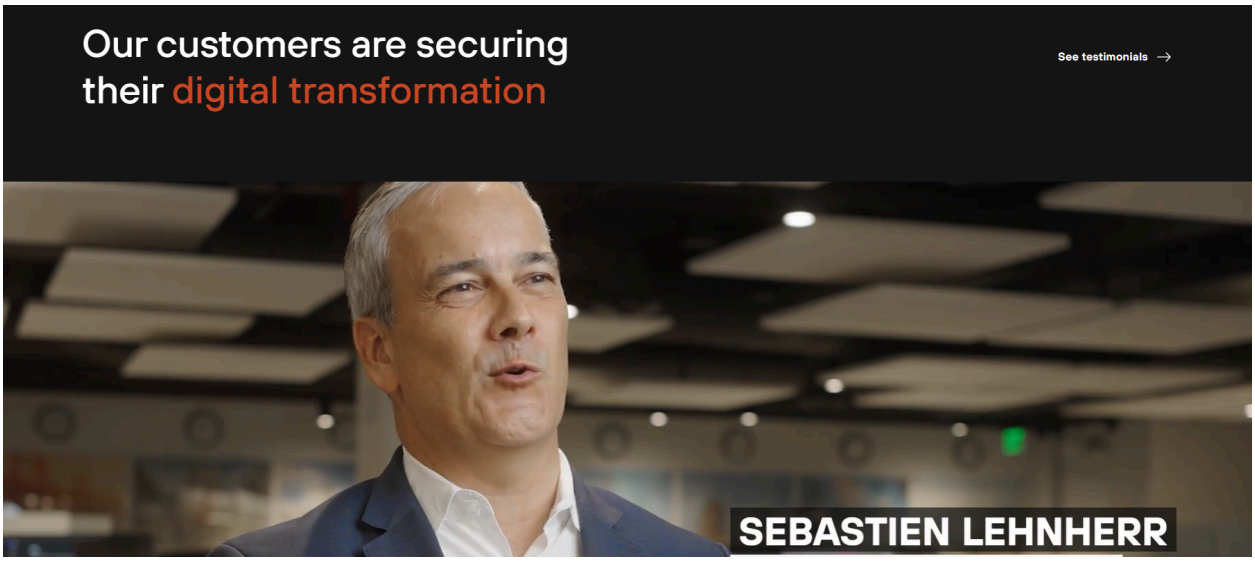

2. **Sub-category Navigation to Addressing current cybersecurity trends**

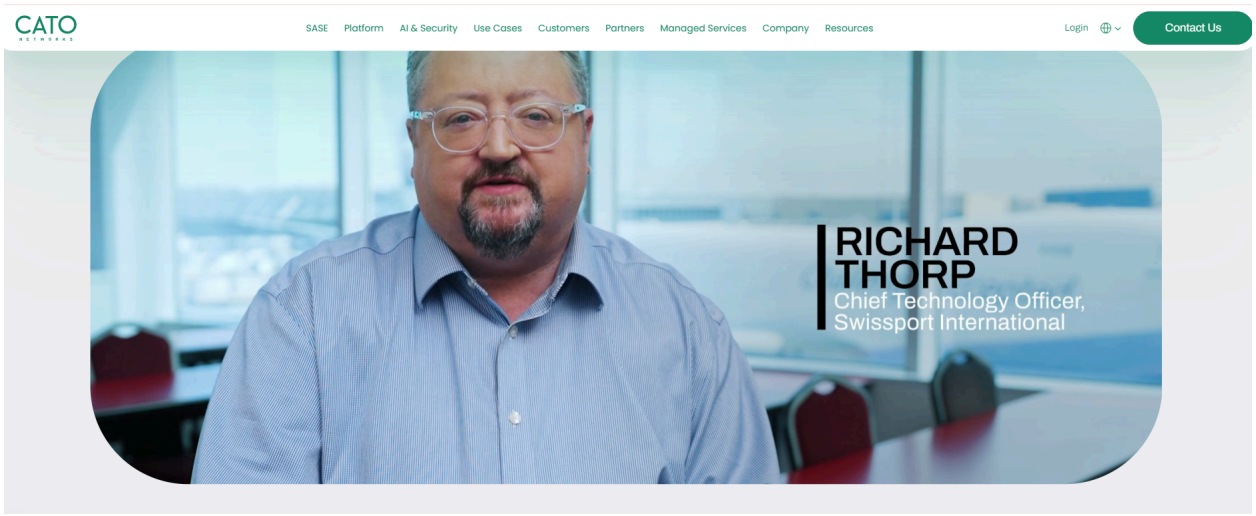

Addressing current cybersecurity trends:

- Palo Alto Network integrates content discussing AI usage and common attack vectors, to highlight security pain points and solutions.

3. Optimized Call-to-Action (CTA) to Multimedia Integration

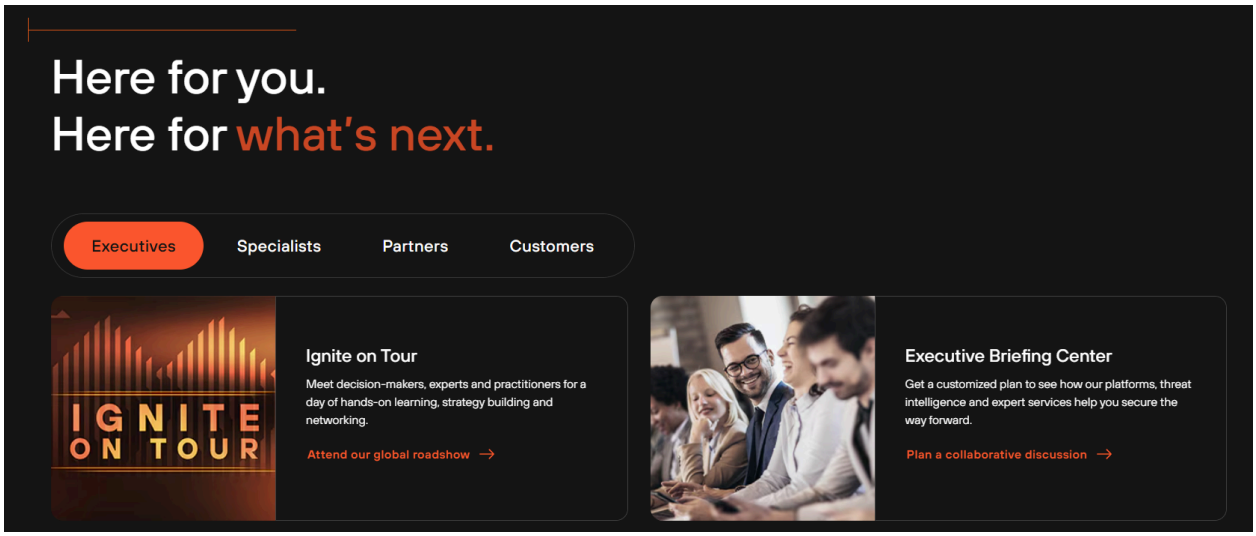

Multimedia Integration:

- Addition of videos on landing pages

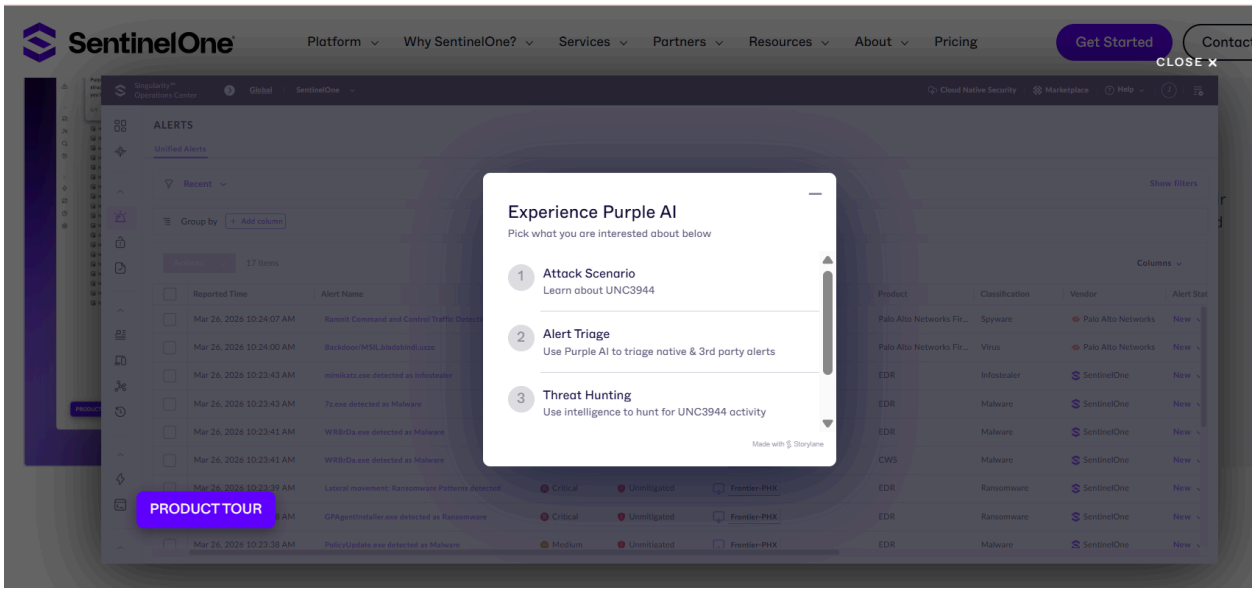

4. Contextual Discovery to Website Audience Segmentation

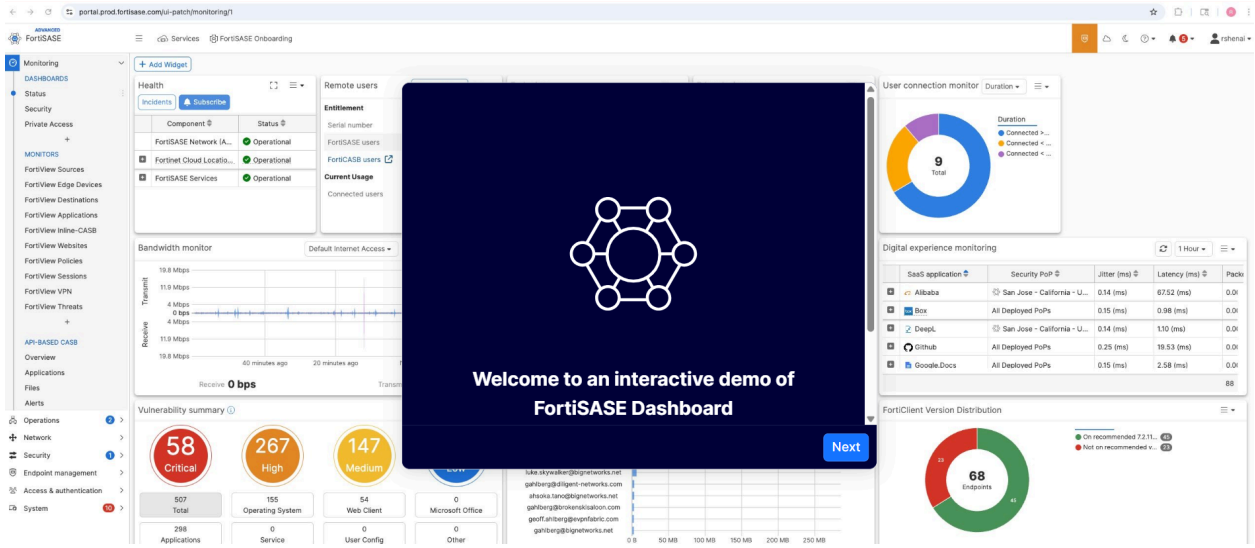

Website Audience Segmentation

- The website caters to different target segments: Executives, Specialists, Partners, and Customers. https://www.paloaltonetworks.in/#solutions
- Relevant pages and content provided specifically for each of these identified segments, as exemplified by the provided solutions URL.

5. Thought Leadership Hubs to Interactive Product Tour

Interactive Product Tour

- The website incorporates a different, more interactive UI for the product tour, focusing on easy accessibility and providing real-time insights - [Purple AI | AI Security Analyst for Autonomous SecOps | SentinelOne]
- FortiSASE UI is fully revamped from product tour to demo to FAQs to adding reviews and case studies [https://www.fortinet.com/products/sase]
